**STRINGING MACHINES**

MADE IN GERMANY

# WHO WE ARE

Established in 1918, ZECK leverages over a century of expertise as a global leader in designing and manufacturing machinery and accessories crucial for critical infrastructure projects worldwide. Specializing in overhead transmission lines, rail technologies (including catenary installation units and rail-road vehicles), ropeways, antennas, and underground networks, ZECK excels across essential sectors with innovative engineering solutions.

As a third-generation, family-owned enterprise, ZECK prides itself on a dedicated team of over 300 professionals and a presence in more than 110 countries. Beyond delivering exceptional products, we provide personalized consulting and steadfast support throughout every project's lifecycle.

With a track record of success, ZECK has sold more than 12,000 machines, underscoring our commitment to excellence and customer satisfaction. Driven by a commitment to sustainability and cutting-edge technologies, ZECK fosters enduring partnerships with our clients, actively shaping the future of infrastructure development, project by project.

## OUR EXPERTISE

With over a century of excellence, we specialize in innovative machines for overhead transmission and cutting-edge solutions in rail technology. Our long-standing commitment to quality and innovation drives us to lead and advance these industries.

ACCESSORIES

# OVERHEAD TRANSMISSION

Our extensive product range includes drum winches, double drum winches, pullers, tensioners, puller-tensioners, rope recovering units, and more, designed for efficient and reliable overhead transmission line construction.

PULLER - SPW 3.5 Z414

ELECTRIC DRUM WINCH: EST 140

DRUM WINCH: ST 140

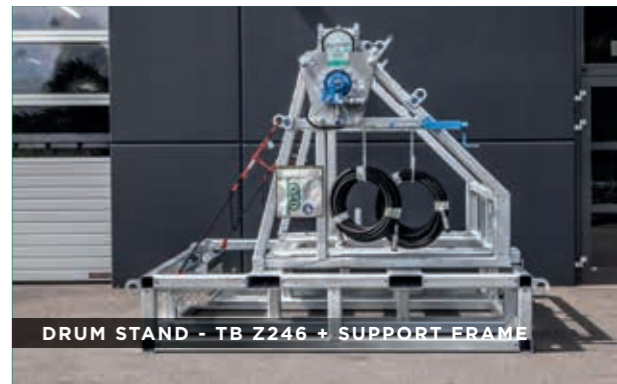

PULLER - SPW 30 T

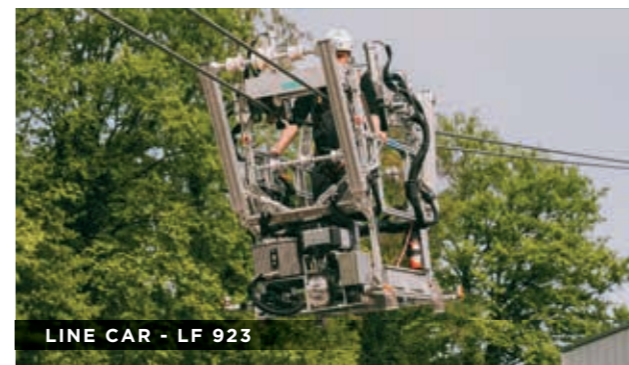

TENSIONER - B 1500/14

PULLER-TENSIONER - WB 1800/14+7

DRUM STAND - TB Z246 + SUPPORT FRAME

LINE CAR - LF 923

HELICOPTER STRINGING  
HA HELI Z246-700 | HTB HELI Z191

CATENARY INSTALLTION UNIT: BM 984

CATENARY INSTALLTION UNIT: BM 992

CATENARY INSTALLTION UNIT: BM 954

RAIL-ROAD ELEVATED WORKING PLATFORM: RR C-POD 9

RR A-POD 18

DRUM STAND - TB 20-2W Z504

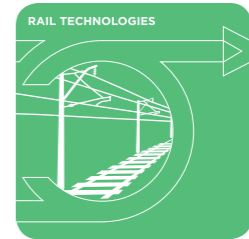

DRUM STAND: TBH 20

PULLER: SPW 1

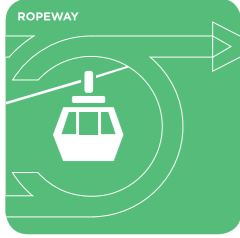

CATENARY INSTALLTION UNIT: BM 969

# RAIL TECHNOLOGY

Explore our range of rail technology solutions, featuring catenary installation units and versatile rail-road vehicles designed to meet the demanding needs of modern railway projects.

## ROPEWAY

Discover our specialized ropeway technology solutions, including tension stringing machines and equipment essential for installation and stringing in challenging terrains. We address the complex aspects of ropeway construction with precision and reliability.

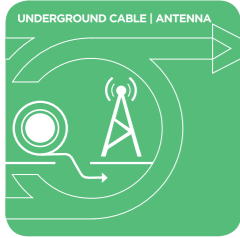

ROPEWAY PULLER-TENSIONER: RW WB 2400/40 Z393

ROPEWAY PULLER-TENSIONER:  
RW WB 1800/18 Z389

# UNDERGROUND CABLE | ANTENNA

Many ZECK pullers are suitable for overhead transmission line construction as well as underground cable installation and provide many advantages, such as free wheel devices, fast changing of reels, large reel diameters and high rope speed.

**PULLER:  
SPW 7.5 R Z441**

**PULLERS:  
SPW 3 PR Z415  
SPW 3 P Z415**

## SPECIAL MACHINERY ENGINEERING

**PULLER-TENSIONER: WB 1500/16+4+4+4**

**SPW 7.5 R**

**PULLER-TENSIONER: WB 2400/35 Z394**

**PULLER: SPW 65 Z455**

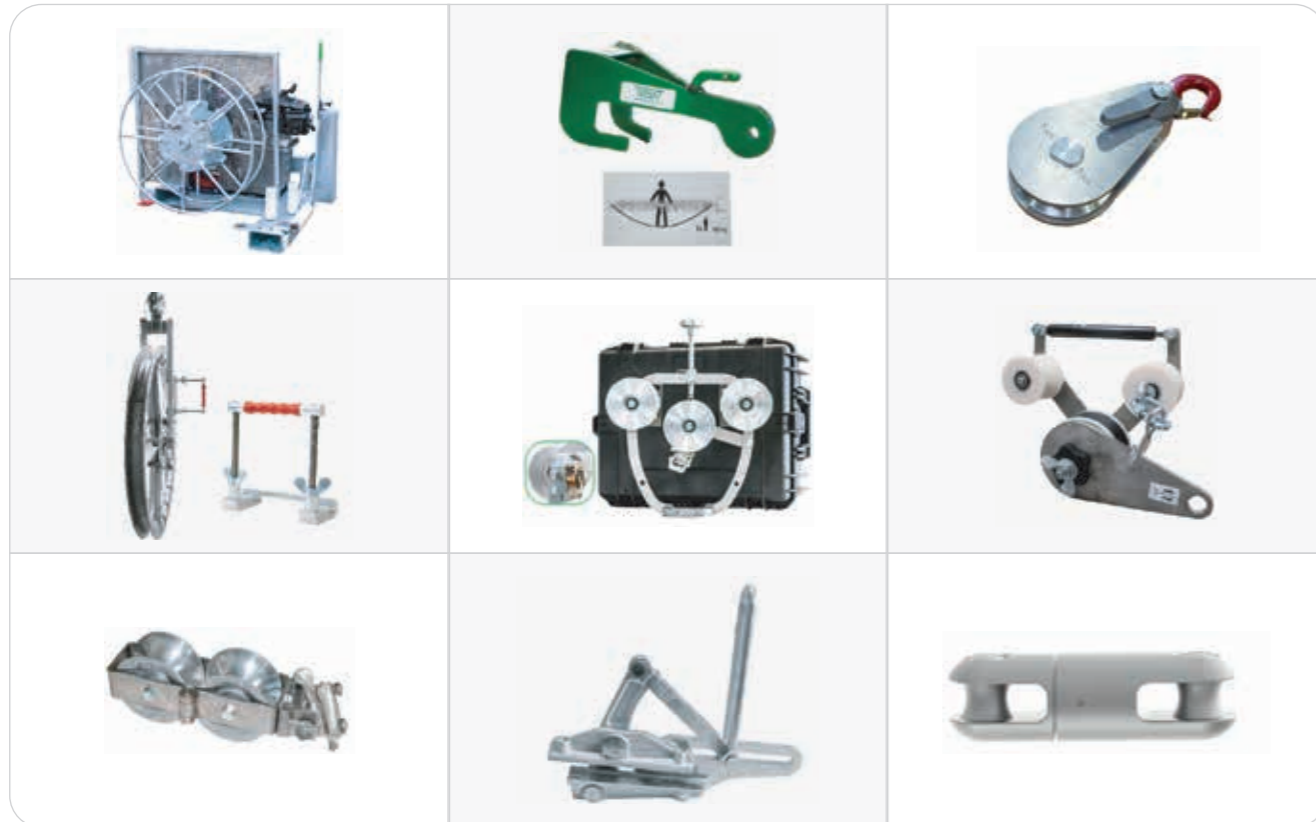

**RECYCLING ROPES: ZAS Z550**

**PULLER: SPW 30 T Z434**

# ACCESSORIES

- Rope winder
- Grab handle
- Reinforced cradle block
- Spacer claw
- Running earth
- Self-gripping clamp
- Alu Snatch Block
- Line tensioner
- Joints and much more...

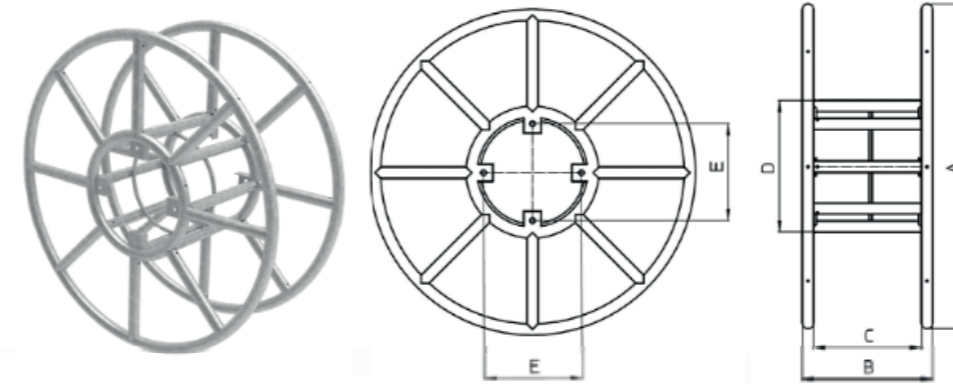

## BRAIDED STEEL ROPE

**Standards-Compliant:**  
Manufactured to EN 12385-4:2002 standards.

**Quality Assured:**  
Braiding process certified to ISO 9001:2015.

**Made in Thailand:**  
Produced at ZECK TSE with top-notch expertise.

AFTER SALES

AFTER SALES

## EXCELLENT AFTER SALES SERVICE WORLDWIDE

For nearly a century, ZECK has been known for its fast and reliable global after-sales service. Our expanded headquarters in Schesslitz and new subsidiary in Wolfenbuettel ensure quick responses to customer needs. With a dedicated team available 24/7, we provide comprehensive support, from spare parts and overhauls to machine transport and emergency services.

# ZECK ACADEMY

## Empowering your team for success

Efficient and safe stringing operations are crucial to the success of your projects. Trained expert personnel make all the difference. At ZECK Academy, we equip your staff to safely and competently maximize the potential of your ZECK machines, ensuring sustainable success.

We uphold the highest quality standards for our ZECK products and training programs. Our state-of-the-art training center and new testing area with a tower provide the perfect environment for hands-on learning of both theoretical and practical skills.

Tailor your training to meet specific needs and projects by combining different modules. We also offer customized training programs developed in collaboration with you, ensuring your expert personnel receive the targeted education they need.
