## AUTOMATIC ROPE CLAMPING SYSTEM

### ROPE CLAMPING WITH SPRINGLOAD

- **Significantly reduced time for drum exchange**  
Additional "self gripping clamp" no longer required
- **Highest level of security due to fail safe design**  
In the event of engine or hydraulic stoppage, the rope clamping system remains active
- **Intellegent design**  
Completely avtomated system with no additional work for the operator
- Optionally available for all ZECK Puller-Tensioner, Tensioners and Pullers
- Maximum of 6 clamps per machine
